PROFESSIONAL SUMMARY

A motivated B.Tech Computer Science and Engineering student specialiing in Artificial Intelligence and Machine Learning. Possesses basic knowledge of web development, machine learning algorithms, data analysis, and Python programming. Looking for an entry-level role or internship to work on real-world AI/ML problems and further strengthen practical and analytical skills.

EDUCATION

B.Tech in CSE with AIML Specialization | Sanjivani University, Kopargaon 2024- 2028 | CGPA:- 9.26 (up to 4th sem)

HSC | Agasti College, Akole 2022- 2024 | Percentage:- 85.62

SSC | Abhinav Public School , Akole | Percentage:- 92.40

TECHNICAL SKILLS

- **Programming Languages:** Python, Java.
- **Data Science and Machine Learning:** NumPy, Pandas, Scikit-Learn, Matplotlib.
- **Data Analysis and Visualisation:** Data Cleaning, Data Analysis, Data Visualisation.
- **Tools & Platforms:** Git, GitHub, VS Code, IBM SPSS, IBM Watson Studio, Google Collab, Power BI.
- **Web Development:** HTML, CSS, JavaScript, Responsive Design, UI/UX Fundamentals, Frontend Development.

PROJECTS

Designed and Developed a Resume Matcher System:

- Built a Python and Streamlit-based application to analyse and match candidate resumes with job descriptions by extracting relevant skills and keywords.
- Implemented text preprocessing, keyword extraction, and similarity matching techniques to evaluate resume-job compatibility and improve matching accuracy.
- **Technologies Used:** Python, Streamlit, Pandas, NL

Designed and Developed a Carbon Advisor System:

- Built an AI-powered advisory system using IBM Granite and Retrieval-Augmented Generation (RAG) to provide carbon footprint reduction recommendations based on user queries and sustainability data.
- Implemented document retrieval, data preprocessing, and prompt engineering techniques to enhance response relevance, accuracy, and knowledge grounding..
- **Technologies Used:** IBM Granite, Python, RAG, NLP, Vector Database

Designed and Developed an Expense Tracker System:

- Built a Python-based expense tracking application using Tkinter and Streamlit to help users manage daily expenses, monitor spending habits, and maintain financial records efficiently.
- Developed a user-friendly interface for adding, updating, and analyzing transactions with real-time summaries and expense insights.
- **Technologies Used:** Python, Tkinter, Streamlit, Pandas

Personal Portfolio Website

- Designed and developed a responsive personal portfolio website featuring project showcases, skills, education, and contact information.
- Enhanced user experience through responsive design, interactive UI components, and cross-device compatibility.
- **Technologies Used:** HTML, CSS, JavaScript, Responsive Web Design

---

Task Management System

- Built a task management dashboard with CRUD operations, task categorisation, priority tracking, and progress monitoring.
- Implemented search, filtering, analytics visualisation, dark mode, and Local Storage for persistent data management.
- Designed a responsive and user-friendly interface to improve productivity and task organisation.
- **Technologies Used:** HTML, CSS, JavaScript.

INTERNSHIP

Company - GREEN RIDER TECHNOLOGY LLP

Role - LLM Post Training Intern *Jan 2026 – April 2026*

- Working on AI and data projects with a focus on LLM post-training and evaluation workflows.
- Gaining hands-on experience in AI data pipelines while developing skills aligned with industry standards.
- Collaborating with Quality Leads and incorporating structured feedback to continuously improve performance.
- Demonstrating strong accountability, maintaining consistent performance, adhering to quality guidelines, and ensuring timely delivery with flexibility to meet business needs.

Company - 1M1B (One Million for One Billion) in collaboration with IBM Skills Build

Role - AI for Sustainability Virtual Intern *Dec 2025 – Jan 2026*

- Completed a virtual internship focused on AI for Sustainability, gaining practical exposure to responsible AI concepts and sustainability-driven problem solving.
- Worked on Agentic AI and Retrieval-Augmented Generation (RAG) systems to address real-world challenges aligned with the United Nations Sustainable Development Goals (UN SDGs).
- Developed understanding of AI applications in sustainability, ethical AI practices, and impact-driven technology solutions.

CO-CURRICULAR ACTIVITY

- Organized Internal Java Coding Competition.
- Participated in **State-Level Project Competition – DIPEX 2025 and 2026**, selected up to the second round.
- Participated in **Smart India Hackathon (SIH)** and was shortlisted at the **college-level selection round**.
- Participated in an international conference and presented a research paper.

CERTIFICATIONS

• Discrete Mathematics	Issued by NPTEL
• Business Ethics	Issued by NPTEL
• Predictive Modelling with IBM SPSS Modeler	Issued by IBM Career Education Program
• Introduction to Python	Issued by IBM Career Education Program
• Data Visualization using R.	Issued by IBM Career Education Program

---

ACKNOWLEDGEMENT

I hereby declare that the information provided above is true and correct to the best of my knowledge. I am confident that if given an opportunity, I will deliver my best and contribute positively to the growth of your organization.

Place: Akole

Date: 01 June 2026
